PRESS RELEASE

ACI Bulgaria affiliated to ACI International

ACI's Council approved the affiliation of ACI Bulgaria The Financial Markets Association to ACI The Financial Markets Association at their recent Council meeting held in Paris November 20th. ACI Bulgaria became the 63rd country of the world wide trader's community association.

"The affiliation of ACI Bulgaria to our international financial markets association provides a huge chance helping to develop an emerging country in this difficult market environment. Besides others a strong focus first will be in divulging our moral and ethical standards of 'The Model Code' but also our International Traders and Back Office Certification programme to the local trading and acting community", Manfred Wiebogen, President ACI The Financial Markets Association.

ACI Bulgaria does have the strong support of their Central Bank and Bankers Association. ACI Bulgaria currently counts some 130 full members from different institutions.

"I am proud to bring the Bulgarian dealers community closer to the international traders' network. Certifying our members by ACI standards will be one of our first tasks. Treasury business is a matter of trust and personal contacts, ACI's network will help us enormous in these markets", Nikolay Kolev, President ACI Bulgaria.

ACI is the leading, global association of wholesales financial market professionals and counts some 13,000 international members – www.aciforex.org
